PROS

-Intuitive look and feel and clear arrival time presentation with enhanced functionality.
- Create, name and order your own favorite stops.
- New layout for Stop detail with street map.
- Integration with transit operator's website, published schedule, interactive voice response (IVR) and text messaging (SMS).

CONS

-Times given for the next bus are wildly inaccurate
-GPS only works half the time and is unpredictable.

MORE INFO

"Used to be best bus app around
To start off I have owned this app for about 3 years and it has always been helpful and reliant. This app now has just either been not taken care of like how it used to be but now the bus scheduling times wont even be accurate. I see a bus that says it's coming in 4 minutes but 12 minutes pass by and still no bus and if you favorite a specific bus stop it tells me different times from the nearby buses and the bus I favorited. Please consider getting this app back on point."
