Competitive Analysis

OneBusAway

PROS:

Allows users to search by route, address, or stop number.

Shows the user stops near them and estimated bus arrival times.

Allows users to bookmark stops for easy access later.

CONS:

Only has transit information available in certain cities.

Inconsistent in reliability as times are estimated.

Plan your trip no longer a feature - Only shows estimated arrival times and the route it takes.

OVERVIEW:

"Find nearby stops, look up stops and routes, set reminders, plan a trip, pay your fare, see real time vehicle locations and arrival predictions while you are on the go."
While they say they have all these tools, times provided are estimated times making planning your trip unreliable. Also the plan for a trip feature no longer works because they can't afford it and pay your fare links to a different app.

ADDITIONAL INFO:

User interface is rough.

There are multiple one star reviews from users saying it is unreliable.
